

# HIGH-QUALITY RADIOGRAPHIC SYSTEMS, MADE IN EUROPE

## COMPANY PROFILE

Control-X Medical was established in 1990 with the ambition of **designing and producing world class diagnostic X-ray systems for medical and veterinary use**. Our products and operations are constantly **reviewed in accordance with the key global regulatory requirements (ISO, CE, FDA)** enabling us to market our products worldwide.

Our broad international footprint is made possible by a **network of highly qualified and experienced reseller partners** who provide personal, local service to our customers.

### HEADQUARTERS

Control-X Medical cPlc.  
1141 Budapest, Hungary  
Öv street 29.  
+36 1 381 0301  
sales@cxmed.com

**30 Years of “Customer First”**

**5500+ Installations Worldwide**

**Sophisticated, Cost-effective and Robust X-ray Systems**

**Full System Integration, Outstanding Image Quality, Flexible Configurations**

Our **aim** is to develop **long term, mutually beneficial partnerships with our customers**. A prime example is our cooperation in South Africa (and the region beyond) with Tecmed Africa, the largest medical solutions company in South Africa. In recent years we have together successfully contributed to **expanding access to high quality diagnostic imaging in the region** by delivering 100+ highly sophisticated digital Perform-X radiographic systems.

*“I am so proud of the Tecmed team and your company for its constant support and efforts to deliver on a complex project in a very challenging global economic environment.”*

William Sykes, CEO Tecmed Africa

## PRODUCT PORTFOLIO

### MEDICAL RADIOGRAPHIC SYSTEMS

Control-X Medical develops and markets a range of human diagnostic X-ray products from fully automated digital systems to simpler, manual setups with solutions for every market and medical institution.

Our flagship **Perform-X** family of **medical diagnostic X-ray suites** offers **full automation** to accelerate procedures for patients while ensuring safety and reducing the stress and workload of busy hospital staff. The **Z-Motion Universal Radiographic System** is among the best in its category and was honoured with the Hungarian Quality Product Award.

### VETERINARY RADIOGRAPHIC SYSTEMS

Control-X Medical is **active in the field of veterinary radiology** too. **ZooMax** small animal systems are very popular in countries such as the US, Finland, Denmark, Germany and Austria as well as Singapore, where veterinary clinics demand high quality and durable systems.

The top of the ZooMax product range is a ceiling-mounted telescopic system suitable for examining **large animals** such as horses and camels. These **ZooMax Equine** systems are already in use in leading US, German, Swiss and Scandinavian veterinary university clinics.

### PRODUCT AND TECHNICAL SUPPORT

Control-X Medical is **present at major industry trade shows worldwide**, such as RSNA, Medica, ECR and Arab Health. Moreover we work to strengthen brand recognition and to **support our partners in their business development** efforts.

The company's full range of high-quality radiographic systems is flanked by **top-notch service and support ensured jointly through our local distributors and our in-house technical personnel**. **Sophisticated remote diagnostics tools** allow prompt and efficient technical service when needed. Furthermore Control-X Medical regularly organizes technical trainings courses to ensure our partners are equipped with the latest know-how and toolset to service our customers.
